

AS152 – Growth factor genes & breast,colorectal,endometrial cancer

AS152 used the same cases and controls selected for AS129: Diabetes+IGF-I in colorectal,breast,endometrial cancer. Four participants were excluded from AS152 due to refusal to allow their DNA be used. AS129 did not use DNA so this criterion was not applied at the time AS129 participants were selected.

See AS129-Diabetes+IGF-I in colorectal,breast,endometrial cancer sample selection.
