

WHI data collection system

- 1: Create Software Applications
 - 2: Create Database Structures
 - 3: Provide Data for Analysis
-

Overview of WHI data collection

Mailing System

- Creates mailings for Newsletters, Letters and Annual Forms
- Determines who is due to receive their forms
- Determine what forms should be sent
- Creates the labels to be applied to the envelopes OR the participants to be loaded into REDCap

Mailing System (Online Forms): REDCap (Research Electronic Data Capture) Mailing

Created by
Vanderbilt
University in
2004

We started using
in 2019

Allows us to
create a web-
based version of
our paper forms

The forms are
active for 21
days

Mailing System (Paper Forms): CCC Mailing

Created in-house by the Database Unit

Paper Mailings

- Who is due to receive their annual forms?
- Creates address labels

Ppt Response

Form Response

Consent Response

Ppt response summaries are for ppts whose first mailing is found in the search criteria above. Remails are those that are related to the first mailing and can occur outside of the found batches. Cumulative response is based on the mailing window, initial and remail, as a whole. Note: These numbers will differ from the Annual Progress Report and PMC reports as there is no constraint for ppt mailing window or PMC report window applied.
